Summary

Highly Skilled MERN Stack Developer with extensive experience in developing secure and scalable web applications. Proficient in MongoDB, Express.js, React.js, and Node.js, with a proven track record in delivering high-performance full stack solutions. Adept at implementing cybersecurity best practices, including secure coding standards, authentication protocols, and vulnerability mitigation techniques, ensuring compliance and application security. Strong problem-solving abilities, collaborative approach, and commitment to delivering high-quality software solutions tailored to client needs.

Experience

Nodejs Developer, Orbiter	03/2024 – 09/2024 Jaipur, India
- Developed backend services using Node.js and Express.js, contributing to a scalable architecture for content aggregation. - Implemented web scraping modules using Cheerio to extract and normalize news data from sources like News24, ensuring robust and reliable data ingestion. - Designed and optimized RESTful APIs to serve scraped content and recommendations efficiently. - Collaborated with the frontend team to integrate APIs into the user interface and improve overall application performance. - Engineered a basic recommendation system to personalize news delivery based on user interactions and content similarity.	

Education

B.Tech in Computer Science, Arya College of Engineering Kukas, Jaipur	09/2021 – 04/2025
GPA: 8	Jaipur

Skills

Web Development HTML, CSS, JavaScript, Node.js, React.js, Redux, MongoDB, Mongoose, Express, WebSockets, WebRTC, Next.js, TypeScript	Cyber Security Networking, Threat Analysis, Information Gathering, Cryptography, Steganography, System Security
Programming Language C, C++, JavaScript	

Interests

GraphQL, Redis, Apache Kafka

Internship

Full Stack Web Developer 📄, <i>Learn And Build</i>	07/2023 – 08/2023
---	-------------------

Projects

Video Calling App (WebRTC)

Developed a real-time video calling application utilizing WebRTC technology. Implemented media streaming, signaling using a Node.js server, SDP negotiation, and ICE candidate exchange for seamless communication.

Express.js Clone (Nodester)

Designed and built a clone of the Express.js framework using the Node.js HTTP server. Integrated core routing and middleware functionality. Successfully published the project on npm, demonstrating strong skills in backend development and package management.

iSecure Note-Taking WebApp

Engineered a secure note-taking web application with JWT-based authentication, a robust login system, and protection against password cracking attacks. Applied salted password hashing to counter rainbow table threats, showcasing advanced security practices.

Employee Management System

Created a comprehensive Employee Management System using React.js and local storage. Integrated features for task assignment, status updates, enabling efficient management of completed, failed, active, and new tasks.

Certifications

MongoDB Atlas, CRUD Operations, Indexing, Aggregation, Transactions, and Search, Data Modeling, Document Model, and Database Connectivity
MongoDB University Certification

Introduction to Programming in C, NPTEL
Completion of Advanced Cpp Training, Spoken Tutorial Project, IIT Bombay

Cybersecurity Phase 2, ICT Academy Of Tamil Nadu
Cybersecurity Job Simulation, Mastercard Cybersecurity virtual experience program on Forage

CISCO Networking Academy

Completion of C Training, Spoken Tutorial Project, IIT Bombay

Publications

Ransomware and Cyber Extortion, *ResearchGate*

- Analyzed ransomware threats and cyber extortion tactics, examining real-world attacks, encryption methods, and economic impacts.
- Proposed a multi-layered defense strategy focused on early detection, backups, user training, and incident response to enhance cybersecurity resilience.
